SUBJECT Vehicle Construction in East Germany

NO. OF PAGES 1

PLACE ACQUIRED 25X1A

NO. OF ENCLS.

DATE OF INFO.

SUPPLEMENT TO REPORT NO.

25X1X

1. For some time the Eisenacher Motorenwerke (EMW) (formerly the Bayerische Motorenwerke - BMW) has been producing on a production line basis a vehicle which is almost exactly like the American Jeep. A small undetermined number of these vehicles have already been delivered, presumably to the East German armed forces.
2. The Ifa Blochverformungswerk, Leipzig W 33, Markrandstaedterstrasse, produces the fuel tanks for tank trucks (Tankfahrzeuge) for the Russian Army. The tanks are completely produced at the plant and mounted on the tank trucks. The trucks are ready for use when they leave the factory.
3. The LOMA Wldau plant (formerly Schwarzkopf, Lokomotiv - und Waggonbau) is allegedly producing individual parts for tanks. As of 13 October 1952 a new power house with five generators (gas) was almost completed.
4. The branch plant of Horch Zwickau which is located in Werdau was receiving deliveries of 3-millimeter plate from Walzwerk Kirchmoeser in October 1952. The plate was allegedly used in the manufacture of three-axle army vehicles, probably prime movers (Zugmaschinen).
